## Achievements and Prospects of the Conservation and Restoration Project of the Preah Pithu temple group in Angkor Complex

### Invitation

Korea Cultural Heritage Foundation (hereinafter KCHF) launched an international development cooperation project “The Conservation and Restoration Project of the Preah Pithu temple group in Angkor Complex” with the aid of Korea International Cooperation Agency (hereinafter KOICA) in 2015. The 1st phase is scheduled to end at November, 2018.

Even though the monuments are situated inside the boundaries of great Angkor Thom, the symbol of the golden age of Khmer Empire, it is not well known and Korean and Cambodian experts have conducted survey and research in various fields, in order to conserve and restore the Preah Pithu temple group.

Through this seminar, KCHF will share the accomplishments and discuss for future development.

We would like to ask for your presence with advice in order to promote and expand the international development cooperation project of KOICA, CHA and KCHF for a more meaningful direction.

Thank you very much.

**JIN, Ok-sub**

President  
Korea Cultural Heritage Foundation
